Ionian University

2018 - present

Languages

- English (C2)
- French (A2)
- ()

Interests

- Gaming
- Calisthenics
- Learning new languages

Career Profile

My name is Panagiotis Moutsiounas and I am an undergraduate student at Ionian University, Department of Informatics, based at Corfu, Greece. I was born in the town of Kozani, at 31/3/2000 and I always had an interest in discovering new things. I started programming at the age of 17 and I really enjoyed it, thus coming to the beautiful island of Corfu to take my programming skills further. I also enjoy learning new languages, thus currently exploring the beautiful language of French, hoping to be a full time Telecommunications and Network Engineer, in the exquisite country of France.

Experiences

Developer of "Retro Station"

2021 - Present

With the help of some trustworthy colleagues, we are creating a game using Python 3.8 called "Retro Station". It is a game in which will be included a number of retro mini-games, coded for a subject on learning the Python programming language.

Helper in improving the subject book of our professor "Konstantinos Chorianopoulos", called " ".

2019

With several commits, me and my team helped in improving the online course book over a subject in our 3rd semester.

Programming Skills e.t.c.
